PROJECT CHARTER

TADA – Transforming Content Platform into Fintech-Driven Monetization Ecosystem

Prepared by: Dean Phạm

1. Executive Overview

- **Project Name:** TADA – Revenue Distribution & Subscription Settlement Platform
- **Project Type:** Fintech + Digital Content Platform
- **Client:** Vietnamese Content Company (Funded by Indonesian Investors)
- **Duration:** July 2024 – April 2025 (9 months)
- **Project Manager/Role:** Dean (Business Analyst → Product Owner during Build & UAT)
- **Objectives:**
 - Build a financial infrastructure enabling creators and users to earn from webtoon/novel content.
 - Deliver transparent, real-time reporting for investors.

2. Project Purpose

The TADA platform aims to transform a free content creation system into a monetized ecosystem, leveraging Southeast Asia's growing webtoon/novel market. This project addresses the lack of revenue mechanisms, introduces fintech layers (payment, subscription, referral), and ensures investor transparency through bilingual dashboards.

3. Scope

- **In-Scope:**
 - Revenue Engine handling 7 income streams (paid chapter, subscription, donation, ads, affiliate, referral, view-based).
 - Subscription & Payment Module (1–12 month packages, per-chapter at 2,000đ, Momo/ZaloPay/Bank APIs).
 - Referral/Affiliate system with fraud prevention.
 - Real-time Creator Dashboard (total earnings, chapter performance) and secure Wallet/Payout page.
- **Out-of-Scope:**
 - Non-content-related features (e.g., social networking).
 - Detailed investor analytics (only high-level transparency).

4. Stakeholders

- **Client CEO:** ROI & quality focus (High influence).
- **Investor (Indonesia):** Transparency & reports (High influence).
- **Finance Lead:** Revenue split logic (Medium influence).
- **Tech Lead:** API integration (Medium influence).
- **BA/PO (Dean):** Scope & documentation (High influence).

5. Objectives & Success Criteria

- **Objectives:**
 - Automate revenue distribution across 4 stakeholders (Creator, Referrer, Platform, Investor).
 - Enable dual-income model (Creator + Viewer via referral).
 - Deliver bilingual, real-time dashboards.
- **Success Criteria:**
 - 90% automation in payout calculations.

- ≥99% payout accuracy.
- +25% creator retention.
- Full investor transparency via bilingual reports.

6. Milestones

- **Jul 2024:** Elicitation & Discovery (BRD draft).
- **Oct 2024:** Current State Analysis (AS-IS BPMN).
- **Dec 2024:** Solution Design (TO-BE BPMN, Architecture).
- **Feb 2025:** Build & Integration (Revenue Engine, Payment API).
- **Apr 2025:** UAT & Sign-off. (expected)

7. Risks & Mitigation

- **Risk:** Complex financial logic delays development.
 - **Mitigation:** Simulate rule matrix in workshops.
- **Risk:** Time zone difference with investors.
 - **Mitigation:** Async updates + bi-weekly reports.
- **Risk:** Creator UX concerns.
 - **Mitigation:** Figma mockups for feedback.
