

Data Mapping Table: Creator – Content – Engagement – Wallet

DATA MAPPING TABLE – TADA v2

TO-BE Fintech Monetization Flow

1. DATA MAPPING (Core Entities)

Entity	Table	Key Fields	BPMN Step	UI Display	API Endpoint
User / Creator	users	user_id (PK) , role (USER/CREATOR) , email , wallet_balance	Register , Login , Update Wallet	My Account, Wallet	GET /users/{id}
Content	contents	content_id (PK) , creator_id (FK) , title , chapter_no , price (2000d)	Buy Chapter , Subscribe	Chapter Detail	GET /contents/{id}
Transaction	transactions	tx_id (PK) , user_id (FK) , content_id (FK) , type (PAID/SUB/DONATE/ADS/AFF/REF/VIEW) , amount , status	Confirm Transaction	Receipt	POST /transactions
Revenue Split	revenue_splits	split_id (PK) , tx_id (FK) , stakeholder (CREATOR/REFERRER/PLATFORM/INVESTOR) , percentage , amount	Revenue Distribution Engine	Internal Only	GET /splits/{tx_id} (Admin)
Wallet	wallets	wallet_id (PK) , user_id (FK) , balance , last_payout_date	Update Wallet , Request Payout	My Account → Wallet	GET /wallet/{user_id}
Referral	referrals	ref_id (PK) , referrer_id (FK) , referee_id (FK) , ref_code , status (VALID/FRAUD)	Refer (Share) , Referral Validation	Referral Link	POST /referrals/validate

2. REVENUE RULE MATRIX (Configurable DB Table)

```
CREATE TABLE revenue_rules (  
  rule_id INT PRIMARY KEY,  
  stream_type VARCHAR(20), -- PAID_CHAPTER, SUBSCRIPTION, DONATION, ADS, AFFILIATE, REFERRAL, VIEW_BASED  
  creator_pct DECIMAL(5,2),  
  referrer_pct DECIMAL(5,2),  
  platform_pct DECIMAL(5,2),  
  investor_pct DECIMAL(5,2),  
  updated_at TIMESTAMP  
);
```

stream_type	creator_pct	referrer_pct	platform_pct	investor_pct	BPMN
PAID_CHAPTER	70.00	10.00	15.00	5.00	Revenue Engine
SUBSCRIPTION	60.00	0.00	30.00	10.00	Revenue Engine
DONATION	95.00	0.00	3.00	2.00	Revenue Engine

stream_type	creator_pct	referrer_pct	platform_pct	investor_pct	BPMN
...	...	...	...	...	...

Admin UI → Edit % → Áp dụng real-time

Không lộ ra Creator/User

3. DATA FLOW MAPPING (BPMN → DB → UI)

BPMN Step	Write To	Read By	UI Display	Trigger
Buy Chapter → Call Payment Gateway	transactions	Revenue Engine	Receipt	Sync
Revenue Distribution Engine	revenue_splits	Update Wallet	Internal	Async
Update Wallet	wallets.balance += amount	View Wallet & Payout	Wallet in My Account	WebSocket
Push to Dashboard	dashboard_cache (Redis)	View Earning Summary	Dashboard	WebSocket
Referral Validation	referrals.status = VALID	Update Wallet	Referral History	Async

4. UI → DATA MAPPING (Dashboard & Wallet)

UI Element	Data Source	Table.Field	Format	Real-time?
Total Earning	SUM(revenue_splits.amount WHERE stakeholder='CREATOR')	revenue_splits	2,846,100đ	Yes
Estimated This Month	FORECAST()	transactions	80,000đ	Yes
Chapter Revenue	transactions.amount WHERE content_id=XX	transactions	1,780đ	Yes
Your Share	revenue_splits.amount WHERE stakeholder='CREATOR'	revenue_splits	1,246đ	Yes
Wallet Balance	wallets.balance	wallets	2,846,100đ	Yes
Next Payout	IF(balance >= 500000, '01/NextMonth', 'N/A')	wallets	01/05/2025	Yes

5. API MAPPING (REST + WebSocket)

Endpoint	Method	Request	Response	BPMN Trigger
/wallet	GET	{user_id}	{balance, next_payout}	View Wallet & Payout
/dashboard/summary	GET	{creator_id, period}	{total, chart, table}	Push to Dashboard
/transactions	POST	{content_id, type, amount}	{tx_id, status}	Confirm Transaction
WebSocket	/ws/earning	Subscribe	Push {type: 'UPDATE', data: {...}}	Update Wallet , Push to Dashboard
